INSTALLATION ADVICE | CONSIGLI DI POSA | CONSEILS DE POSA | VERLEGEEMPFEHLUNGEN

Si consiglia di sfalsare il lato più lungo per un massimo di 20 cm nella posa a correre. | The longest side should be staggered no more than 20 cm when laid in running bond. | Il est recommandé de décaler le côté long d'un maximum de 20 cm dans le cas de la pose parallèle. | Die laengere Seite darf maximal um 20 cm versetzt werden, sollte im wilden Verband verlegt werden.

AVVERTENZA PER I SIGNORI POSATORI Controllare attentamente il materiale prima della posa particolarmente tono, calibro e scelta. Non si accettano reclami sul materiale posato. Si declina ogni responsabilità per la posa senza fuga; si considera posa a "giunto minimo" quella con fuga a 2 mm. | **NOTICE TO TILE FIXERS** The material should be carefully checked before fixing, especially tonality, caliber and choice. Claims cannot be accepted once the material is installed. The company declines all responsibility for laying without joints; minimum joint laying has a gap of 2 mm. | **AVIS AUX CARRELEURS** Contrôler attentivement les carreaux avant la pose particulièrement tonalité, calibre, choix. Aucune réclamation ne sera acceptée une fois que le matériel est posé. La responsabilité du fabricant ne pourra pas être mise en cause en cas de pose sans joints. On appelle "pose à joint minimum" une pose avec un joint de 2 mm. | **HINWEIS FUER DIE VERLEGUNG** Das Material ist vor der Verlegung genau zu überprüfen auf Tonalität, Kaliber, und Sorte. Reklamationen nach der Verlegung werden nicht akzeptiert. Wir übernehmen keine Haftung für eine fugenlose Verlegung; unter einer Verlegung mit sehr schmalen Fugen versteht man die Verlegung von 2 mm breiten Fugen.

L'Azienda assolve agli obblighi sulla marcatura CE

The Company fulfils its CE marking obligations through

Die Firma erfüllt die Verpflichtungen für das CE

Conformément aux dispositions en matière de marquage CE

Le norme UNI EN

UNI EN Regulations

Die UNI EN-Normen

Les Normes UNI EN

Le norme **UNI EN**, recepite dal CEN, (Commission Européenne de Normalisation), hanno valore in tutta Europa e interessano tutti i tipi di piastrelle, pressate e trafilate, smaltate e non smaltate, di qualunque formato, di sola 1° scelta. Le norme **UNI EN** trovano corrispondenza con alcune modifiche delle nuove norme internazionali **ISO** e si compongono di:

NORME GENERALI

La nuova norma armonizzata **EN 14411** fornisce definizioni, classificazione, caratteristiche e marcatura per le piastrelle di ceramica ed annulla e sostituisce la norma **EN 87**.

La nuova normativa **UNI EN ISO 10545_1** stabilisce le regole per la composizione del lotto di campionamento e sostituisce la precedente norma **EN 163**.

NORME DI PRODOTTO

Le piastrelle di ceramica sono suddivise in gruppi secondo il metodo di formatura ed il grado di assorbimento d'acqua. Sono contraddistinti due gruppi **A** e **B**, in funzione del metodo di formatura:

A Piastrelle estruse (ovvero formate tramite il passaggio della materia allo stato plastico, attraverso un "trafilatore" che costituisce un nastro in seguito tagliato alla misura voluta).

B Piastrelle pressate (ovvero ottenute tramite la pressione della materia prima allo stato di polvere secca, in appositi stampi). Tali piastrelle possono essere smaltate successivamente, o non smaltate.

I gruppi sono a loro volta suddivisi in sottogruppi, secondo il grado di assorbimento d'acqua (porosità) presentato:

- Gruppo B Ia = E ≤ 0,5%	UNI EN 14411_G
- Gruppo B Ib = 0,5% < E ≤ 3%	UNI EN 14411_H
- Gruppo B IIa = 3% E ≤ 6%	UNI EN 14411_J
- Gruppo B IIb = 6% < E ≤ 10%	UNI EN 14411_K
- Gruppo B III = E > 10%	UNI EN 14411_L

Le norme definiscono per ogni gruppo di prodotti le dimensioni, le tolleranze dimensionali, le caratteristiche meccaniche, fisiche e chimiche, l'aspetto e la designazione delle piastrelle ceramiche. Le piastrelle dell'attuale gamma Herberia sono tutte ottenute per pressatura e appartengono ai gruppi B Ia, B Ib, B IIa, B IIb, B III.

NORME PER I METODI DI PROVA

Queste norme definiscono i metodi per la determinazione delle caratteristiche dimensionali e di aspetto, delle proprietà fisiche e delle proprietà chimiche. La norma **14411** fa riferimento ai metodi di prova delle nuove norme **UNI EN ISO 10545**.

marchio CE

CE Marking
CE Kennzeichen
Marquage CE

The **UNI EN** standards, adopted by the CEN (European Committee for Standardization) are valid throughout Europe and apply to all types of first choice tiles, pressed and extruded, glazed and unglazed, of any size. The **UNI EN** standards are compatible with the latest amendments of the new **ISO** international standards, and include:

GENERAL REGULATIONS

The new harmonised standard **EN 14411** that provides definitions, classifications, features and designation requirement for ceramic tiles and annuls and replaces standard **EN 87**.

The new standard **UNI EN ISO 10545_1** that sets forth the rules for the composition of sample lots, and replaces the previous standard **EN 163**.

PRODUCT REGULATIONS

Ceramic tiles are divided into groups according to how they are formed and their water absorption characteristics. In terms of forming methods, there are two groups: **A** and **B**.

A Extruded tiles (formed by means of passing a malleable paste through an extrusion machine; the resulting band is cut into the desired dimensions).

B Pressed tiles (obtained by pressing powdered raw materials in special molds). Afterwards, these tiles may be glazed or not.

The groups are broken down further according to their water absorption characteristic (porosity):

- Gruppo B Ia = E ≤ 0,5%	UNI EN 14411_G
- Gruppo B Ib = 0,5% < E ≤ 3%	UNI EN 14411_H
- Gruppo B IIa = 3% E ≤ 6%	UNI EN 14411_J
- Gruppo B IIb = 6% < E ≤ 10%	UNI EN 14411_K
- Gruppo B III = E > 10%	UNI EN 14411_L

The regulations define the sizes, the size tolerances, the mechanical, physical and chemical properties, the appearance and designation of the ceramic tiles in each group. The present range of Herberia tiles is entirely composed of pressed tiles and belongs to groups B Ia, B Ib, B IIa, B IIb, B III.

REGULATIONS FOR TESTING METHODS

These regulations define the methods to be used for determining size and appearance characteristics, as well as physical and chemical properties. Standard **14411** refers to the testing methods of the new **UNI EN ISO 10545** standard.

Instructions for the laying

Consigli per la posa - Verlegungshinweise - conseils pour la pose

All Idea Ceramica products & lines are of the highest quality, and their installation is easy and does not present any kind of inconvenience or require any special or unusual procedure. In order to obtain the best possible end result we suggest you to follow these simple steps.

Tutte le collezioni e i prodotti Idea Ceramica sono di altissima qualità, per poterli però posare al meglio e senza incorrere in spiacevoli inconvenienti ora e in futuro vi consigliamo di seguire alcune piccole regole base che riportiamo qui di seguito.

Toutes les series et les produits de Idea Ceramica, Groupe Moma S.p.A. sont de très haute qualité et pour une pose correcte nous vous prions de suivre les conseils suivants.

Alle Kollektionen und Produkte von Idea Ceramica sind von bester Qualität. Um bei der Verlegung das beste Ergebnis zu erhalten, möchten wir Ihnen folgende kleine Basisregeln empfehlen, welche wir hier unten anführen, um bedauerliche Unannehmlichkeiten zu vermeiden.

INSTALLATION INSTRUCTIONS

These materials, being ceramic products, present chromatic and veining variations in the single pieces. The material you are about to install, if compared to the sample from which the selection was made, will present certain differences, the sample is just indicative of the characteristics of the products, it does not represent the whole production. Please, check and mix the setting materials before beginning installation. For the combined horizontal-vertical setting, the joint between the vertical elements should be half the size of the one between the horizontal elements. IE: 1,5 mm between the vertical elements and 3 mm between the horizontal. The same for the combined setting of 15,3x100 with horizontal. In the showers we recommend you use water resistant grout for the joints.

The company disclaims all responsibility for installations carried out with adhesive different from those indicated or from others that are not technically and unmistakably the same.

ISTRUZIONI PER LA POSA

Questi materiali, essendo prodotti ceramici, potrebbero presentare varianti cromatiche o di venatura nei singoli pezzi. Il prodotto poi, può differire dal campione, in quanto il campione stesso è indicativo. Si consiglia di controllare il materiale prima della posa e di miscelare varie scatole prima della messa in opera. Si consiglia, nella posa combinata orizzontale-verticale, che la fuga fra gli elementi verticali sia la metà di quella fra gli elementi orizzontali. In particolare è consigliata una fuga di 1,5 mm fra gli elementi verticali e 3,0 mm fra gli elementi orizzontali. Lo stesso vale per la posa abbinata 15,3x100 con disposto in posa orizzontale. Assicurarsi sempre che la Superficie su cui andranno posati i prodotti si presenti asciutta, priva di polveri, grassi, cere, e sia dura. Inoltre consigliamo di verificare che tale superficie non presenti pericoli di risalita di umidità.

ATTENZIONE: Non si accettano contestazioni postume per il materiale già posato.

CONSEILS POUR LA POSE

Ces produits céramiques peuvent avoir des variantes chromatiques ou bien des nuance de tonalité tous en restant conforme à l'échantillon et à la production. La nuance de l'échantillon est toujours indicative. Nous vous prions de vérifier les matériaux avant la pose. Nous vous conseillons de faire un joint de 1,5 mm. pour la pose en verticale et un joint de 3,0 mm. pour la pose en horizontal. Tous autres problèmes de poussière, de graisse, de cire, humidité, etc. sont objets de vérification avant la pose.

ATTENTION: Nous ne acceptons pas de contestation après la pose.

VERLEGUNGSHINWEISE

Diese keramische Materialien können an der Oberfläche der einzelnen Fliesen Farb- und Maserungsabweichungen aufweisen. Die Artikel können vom Muster abweichen, da es sich eben um ein sogenanntes Probestück handelt.

Es ist ratsam, das Material vor der Verlegung zu prüfen und verschiedene Schachteln vor dem Arbeitsbeginn zu mischen. Bei der kombinierten Horizontal-vertikalverlegung ist es ratsam, dass die Fuge zwischen den vertikalen Elementen die Hälfte von der Fuge zwischen den horizontalen Elementen ausmacht. Besonders ist eine Fuge von 1,5 mm zwischen den vertikalen Elementen zu empfehlen und 3 mm zwischen den horizontalen Elementen. Dasselbe gilt für die kombinierte Verlegung von 15,3x100 mit in horizontaler Verlegung.

Versichern Sie sich immer, dass die Oberfläche auf der verlegt wird trocken ist, ohne Staub, Fett, Wachs, sowie dass diese hart ist. Weiteres ist wichtig, dass auf der Oberfläche keine Feuchtigkeit auftritt.

ACHTUNG: Nachträgliche Reklamationen für bereits verlegtes Material werden nicht angenommen.

Die Firma steht für weitere technische Informationen zur Verfügung, haftet jedoch nicht für Verlegungen mit anderen Klebern als oben angeführt bzw. andere, die nicht die selben technischen Eigenschaften aufweisen.
